Broomfield CO, United States  
EvanRMora@gmail.com / (303)-621-4628

## SUMMARY

Results-driven Software Engineer with a proven expertise in full-stack engineering, internal tooling, and database management. Recognized for successfully translating business objectives into innovative technological solutions, resulting in a notable 200% increase in revenue year over year in a pioneering hospitality start-up. Adept at leading cross-functional teams and collaborating directly with C-level executives to drive technical innovation aligned with organizational goals.

## TECHNICAL SKILLS

- **Full-stack Web Development:** Proficient in end-to-end web application development, encompassing both front-end and back-end technologies to create seamless and comprehensive user experiences.
- **JavaScript (ES6+):** Extensive experience in leveraging the latest features of JavaScript, including ES6 and beyond, to build dynamic and interactive web applications.
- **TypeScript:** Adept at using TypeScript to enhance the maintainability and scalability of code, providing strong typing and improved development workflows.
- **Ruby:** Expertise in Ruby programming language, utilizing its elegant syntax and powerful features for efficient software development.
- **HTML5:** Advanced knowledge of HTML5, incorporating the latest standards to ensure the creation of modern and accessible web pages.
- **CSS3:** Proficient in CSS3 for styling and layout, with a focus on responsive design and cross-browser compatibility.
- **Database Management:** Skilled in designing and managing databases, ensuring efficient data storage, retrieval, and overall system performance.
- **C++:** Solid proficiency in C++ programming, applying it for various software development tasks and performance-critical components.
- **C#:** Experience in utilizing C# for building robust and scalable applications, particularly within the Microsoft technology stack.
- **Version Control (e.g., Git):** Thorough understanding and practical application of version control systems, particularly Git, to facilitate collaborative and efficient software development workflows.

## SOFT SKILLS

- Communication
- Collaboration
- Adaptability
- Problem-Solving
- Time Management
- Leadership
- Creativity
- Empathy
- Resilience
- Critical Thinking

## EXPERIENCE

**Owner / Software Engineer** / Evan Mora Development LLC- Boulder, CO, United States

12/2023 - Current

- I work directly with companies to apply my engineering skillset to create any range of solutions for large or small businesses alike. I can function as a CTO to lead all engineering efforts related to launching a product.

**Senior Software Engineer** / Cultivate Premium Corporate Gifting - Boulder, CO, United States

1/2024 - Current

- Helped lead a team of 5 engineers to accomplish business objectives, generating millions of dollars in revenue yearly.
- Collaborate directly with the product team and Director of Engineering to accomplish business objectives by independently leading my team to build technology at scale

**Software Engineer** / Showplace Inc - Denver, CO, United States

10/2021 - 12/2023

- Spearheaded the development of a full-stack website, internal tools, and robust database solutions for a hospitality start-up, resulting in a 200% year-over-year increase in revenue.
- Collaborated directly with C-level executives to translate business strategies into innovative technological solutions, aligning development efforts with company objectives.
- Implemented scalable and efficient software solutions, optimizing overall system performance and enhancing the user experience for both internal and external stakeholders.
- Led a cross-functional team in the design and implementation of critical features, ensuring the timely delivery of high-quality software products.
- Conducted regular code reviews and implemented best practices, fostering a culture of continuous improvement and maintaining high code quality standards.

**Jr. Applications Developer** / iLendingDIRECT - Centennial, CO, United States

05/2017 - 08/2018

- Contributed significantly to large-scale development projects, both independently and collaboratively within a team, enhancing the functionality and performance of sales and business performance software.
- Gathered and incorporated end-user feedback to drive iterative development, resulting in continuous product improvement and increased user satisfaction.
- Implemented coding best practices and participated in the software development life cycle, resulting in more maintainable and scalable applications.
- Collaborated with cross-functional teams, including QA and UX, to ensure the seamless integration of new features and improvements into existing systems.
- Demonstrated adaptability and a strong work ethic by successfully managing multiple tasks and responsibilities in a dynamic development environment.

---

## EDUCATION AND TRAINING

**Bachelor of Science:** Computer Science  
University of Denver - Denver, CO

07/2021

- Completed coursework in Full Stack Web Development and Computer Science while concurrently enrolled at the University of Wyoming.

**Bachelor of Science:** Computer Science  
University of Wyoming - Laramie, WY

07/2021

- Completed coursework in Computer Science (Java and C++), Business Ethics and Management, Career and Personal Skills, Mass Media, and Mathematics.

**High School Diploma**

05/2016

Northglenn High School - Northglenn, CO

- Graduated with honors.
- Outstanding high school student of the year, district-wide.
- 3.8 G.P.A.
- 4 Years of STEM studies and project development.

---

## AWARDS & ACCOMPLISHMENTS

- March 2017: Student of The Month, University of Wyoming.
- 2016: Outstanding High School Student of the Year.
- Honor Roll, 4 Years.
